STRENGTH THROUGH COOPERATION

World

Since 1904, ESAB has been both a pioneer and leader in welding and cutting development technology. Today ESAB combines world leadership with global applications expertise.

STRENGTH THROUGH COOPERATION

leader

in welding and cutting technology and systems

With over 100 years of experience, and a presence in over 80 countries worldwide, ESAB is probably the most recognised brand in welding and cutting with a product portfolio, which includes:

Standard Welding and Cutting Equipment

Automatic Equipment

Automated Cutting Equipment

Welding Consumables

Personal Protective Equipment (PPE)

Welding Accessories

By continuously improving and developing our products and manufacturing processes, we meet the challenges of technological advance in every sector and market we operate in. Delivering quality products and services remains at the heart of everything we do across all our global sales and product operations.

Personal Protection

ESAB offer a comprehensive range of Personal Protection Equipment, covering everything from head to toe, for both welding and cutting and general engineering applications. All ESAB and ISO products conform to international standards and relevant EU legislation and standards.

As health and safety standards improve year on year, so does ESAB's commitment to providing a product portfolio capable of meeting the ever increasing demands of the markets we serve. As you would expect from a leading supplier of welding and cutting solutions, the ESAB product range is second to none for quality and reliability.

Helmets, Masks & Screens

Aristo® Tech

The Aristo® Tech helmet has been designed for the professional welder who wants the best in protection and performance. The light weight shell and ergonomically designed headgear offers maximum comfort even when welding for long periods of time. The Aristo® Tech offers the latest in digital lens technology, with internal LCD display, providing the welder full control to adjust shade level, sensitivity and delay settings with precision for any welding application.

Lens Technology

- Variable 5-13 Digital control for adjustment of shade level, sensitivity and delay
- Optical Class 1/1/1
- Quick Set™ allows an easy change of shade by a simple up and down flick of the switch
- Grind mode activated at lowest sensitivity

Comfort Head Gear

- Comfortable, lightweight and fully adjustable ratchet style headgear delivers maximum comfort

Shell

- 3 high gloss colours available – yellow, black & white
- Conforms to:
CE, ANSI, AS/NZS, CSA

Helmet weighs only 490g

ESAB's latest integrated Circuit LENS Technology, offers an internal LCD display with outstanding reliability, suitable for all manual welding processes, including plasma cutting.

- Digital Display Screen
- Lens Delay Control
- Visible Shade & Sensitivity Settings

Designed for use with a wide range of welding applications

Helmets, Masks & Screens

FRONT COVER LENS

The Aristo® Tech front cover lens offers the ultimate in Protection. This lens has been coated for increased scratch and heat resistance. Using a specialised injection moulding process, the lens is pre moulded into a convex curve with an optical class 1. This means that the threat of duplicate ghost Arcs visible through the cartridge is eliminated.

HEAD GEAR

- Robust head gear
- Possibility to move the helmet closer or further away from the face
- Comfortable and replaceable sweat band
- Angled front head band

AVAILABLE IN 3 HIGH GLOSS COLOURS

Helmets, Masks & Screens

New-Tech™ ADC Plus

The ADC plus is the second phase technology from the original New-Tech™ ADC range of welding helmets from ESAB, a market-leading supplier of welding related personal protection equipment. As a result of extensive research into typical application and user comfort requirements, the ESAB New-Tech™ ADC Plus cartridge offers new features, which make these new helmets unique.

The new 'Angular Dependence Compensation' Plus (ADC) ensures that the selected shade covers the full width and height of the LCD screen, whilst the addition of the Plus offers improved colour definition and contrast throughout the cartridge.

- Increased colour definition
- Lighter contrast
- External adjustable shade
- External adjustable sensitivity
- External delay adjustment
- Superb optical quality

1/1/1/1 EN379

There are 3 helmets in the New-Tech™ ADC Plus range all offering superb performance and the ultimate in operator protection and comfort.

New-Tech™ 9-13 ADC Plus

New-Tech™ 6-13 ADC Plus

New-Tech™ 6-13 XL ADC Plus

Helmets, Masks & Screens

The New-Tech™ ADC Plus Difference

XL VIEWING AREA

The New-Tech™ 6-13 XL ADC Plus helmet offers an increased cartridge viewing area of 96 x 68.5mm.

STANDARD ADC PLUS SIZE

XL ADC PLUS SIZE

OPEN STATE

ADC Plus Colour Definition

The ADC Plus range offers superior colour definition in both the open and activated state, allowing the welder to better see the LED displays on machines and equipment, whilst also identifying heat definition on the actual weld.

STANDARD NON ADC PLUS CARTRIDGE

ADC PLUS CARTRIDGE

CLOSED STATE

ADC Plus Optical Quality

The ADC Plus cartridge boasts a 1/1/1/1 optical quality rating, which is the best on the market. This means that an even shade level is seen across the full height and width of the viewing area.

The benefits – an increased shaded area that covers the height and width of the cartridge, whilst reducing bright visible light.

STANDARD NON ADC PLUS CARTRIDGE

ADC PLUS CARTRIDGE

Helmets, Masks & Screens

New-Tech™ 6-13 XL ADC Plus

The New-Tech™ 6-13 XL can be used for almost any application. The shade level can be adjusted from DIN 6 to DIN 13, making this helmet very versatile. All settings are made from the outside of the helmet. The helmet features a grinding mode, where the cartridge can be switched off for grinding, there is also a sensitivity and delay function. The New-Tech™ 6-13 XL is equipped with ADC technology which will ensure a solid shade level even when viewing the lens at an angle, i.e. positional welding. Conforms to EN 175 and EN 379.

Helmets, Masks & Screens

Origo™ Tech 9-13

The Origo™ Tech helmet is available in two striking high gloss colours, 'Yellow' or 'Black'. The helmet features the ESAB comfort headgear, whilst the light weight shell offers superior face, head, ear & neck protection, which allows for welding in all positions. The ESAB variable shade ADF uses the latest technology and has proven reliability. The ADF is screw retained and sits in a fully moulded light seal cradle, which also creates a slight convex curve on the front spatter lens for extra security and strength. The Helmet is delivered in an ESAB display box, fully assembled and ready to use.

Origo™ Tech 9-13

The Origo™ Tech 9-13 features an external shade adjustment between DIN 9 and DIN 13. The delay and sensitivity can be adjusted from the inside. The Origo™ Tech 9-13 is suitable for MIG/MAG, MMA and TIG (over 20 amps). Conforms to EN 175.

Euromask

Euromask is a helmet for welding and cutting that provides effective protection from UV and IR radiation. The visor must always be down when welding. The large field of vision provides effective protection for the eyes when grinding. Euromask can be combined with various IR and UV protectors. Also available with a protective helmet or prepared for use with a fresh air unit.

ESAB Easy-Lite

The Easy-Lite is a small but effective light source, that can be easily attached to your welding helmet, hard hat, spectacle or anywhere that additional light is required. The Easy-Lite has also proven to be an excellent tool for adapting to a stainless steel inspection mirror, the bright LED is perfect for highlighting the weld in difficult places where there is insufficient light. The LED is turned on by a simple switch, and the battery has over 50 hours of life.

Economy ear defender SNR 21 dB	0701 380 477

Respiratory Equipment

Why use PAPR (Powered Air Purifying Respirator)

The welding fume generated from the open arc welding process contains airborne particles released from the consumables and the material being welded. More than 90% of the fume arises from vaporisation of the consumable electrode, wire or rod as material is transferred across the arc or flame. Welding fume particles can be hazardous as they can penetrate the innermost parts of the lungs.

Long term exposure to welding fumes may affect the body's respiratory system, for example through substance inhalation and release into the blood system.

ESAB recommends the use of powered air purifying respirators (PAPR) in combination with ESAB's welding helmet. PAPR units operate by filtering the air through a battery powered unit, which is then supplied into the breathing zone inside the helmet.

ESAB PAPR systems are fitted with a P3 main filter which, if used correctly, can filter out up to 99.8%.

The PAPR should always be used, cleaned, inspected and maintained in accordance with the operating and maintenance instructions provided. A risk assessment should be carried before use to ensure the PAPR system is suitable for the risks involved, the conditions at the place where exposure to the risk may occur, and the period for which it is worn, taking into account the state of health of the person who may wear the equipment, the work to be undertaken and the work environment.

Aristo® Air

The Aristo® Air PAPR (Powered Air Purifying Respirator) system combined with the Aristo® Tech helmet, offers heavy duty protection from welding fume and dust when welding, gouging & grinding. The unit features the latest in PCB Board technology, allowing the welder to adjust the air flow from 170 L/min to 210 L/min to suit the environment and application. This is highlighted by an LED airflow indicator on top of the unit. The Aristo® Air is equipped with audio & visual blocked filter and low battery alarms, offering extra safety for the welder.

The strong physical construction of the Aristo® Air, makes it extremely robust and suitable for all heavy duty welding applications.

- User adjustable air flow 170/210 L/min
- Li Ion battery pack
(up to 8hr duration @ 210L/min)
- P3 filter and pre-filter
- International intelligent charger
(interchangeable pins)
- Audio/visual blocked filter and low battery alarms
- LED air flow indicator
- Battery charge LED indicator
- Flat push button membrane switch
- Supplied with 'new style' comfort pad

Eco Air

The Eco Air powered respiratory systems provides 170 litres of clean/filtered air per minute to give a more pleasant working environment. The unit only weighs 1kg but will still withstand the toughest of environments. The unit is supplied with a P3 filter with an extraordinary filtration capacity. The battery, which have an operating capacity of 8 hours, can be charged separate from the motor unit, hence it can be utilised when working double shifts. The Eco Air is equipped with an Audio low flow alarm and indicates when the battery is running low or when the filter is blocked. The Buddy™ Air can be used together with Aristo® Tech.

Eco Air Complete (EU and UK) including air hose

0700 002 175

Origo™ Air

The Origo™ Air is a battery powered respiratory unit is designed to fit the Origo™ Tech, Globe Arc and Albatross welding helmets. The unit provides clean/filtered air to increase the comfort and safety for the welder. The Origo™ Air is delivered complete with an 8-hour battery, P3 filter, comfort pad, waist belt and an air hose with a Proban hose cover fitted. This unit is supplied with an intelligent charger, which ensures a prolonged life time of the battery, by reducing the risk of over charging. The Origo™ Air is equipped with a low flow alarm, which will give an audible signal when the filter is blocked or the battery power is running low. The complete system is comfortable, lightweight and durable.

ESAB Compressed Air Systems (CA)

ESAB Air CA

The waist mounted regulator is pre-set to reduce the air from high to low pressure and has integral low flow warning alarm. The unit is encased to protect the regulator. The regulator is delivered with an air supply connector which connects the air hose to the regulator. The unit is supplied complete with waist belt. The maximum input working pressure is 10 bar (145 psi).

ESAB Compressed Air Filtration Bank

The filter system consists of three filtration units which will remove liquids, solid contaminants, oil vapour and odours from the compressed air supply and provides clean breathing air to the operators. The filtration bank should be used when a clean air supply is not available. The units are fitted with 1/4" (6,4mm) input hose tail adapter, a 0,5-10 bar adjustable regulator, twin output 'quick-snap' style hose connectors for 1 or 2 operators and a gauge as a guide to output pressure. The filtration bank can be supplied for wall mounting or on a portable frame.

Filtair Disposable Masks

The ESAB Filtair series has been developed to improve the comfort of disposable respirators whilst maintaining an excellent face fit. Colour coding the range makes identification simple when varying levels of protection may be required. The mesh shell supports the filter media and prevents collapse onto the face and the preformed nose bridge provides comfortable fit eliminating constant adjustment. The filters use the latest filter technology to promote low breathing resistance and are approved to EN149:2001 (meeting the 120mg load testing). The Filtair is available as a pre-moulded and a flat version. Depending on the protection level needed and the breathing resistance some models are equipped with a valve. All the masks are fitted with buckle fastening which also allows the wearer to adjust the straps accordingly.

Welding Clothing

Clothing and Workwear

Whatever your welding clothing requirements, ESAB can offer you a high performance range of welding garments suitable for any welding environment. With a great choice of traditional leather or high specification, Phoenix FR® inherently flame retardant fabrics, ESAB's product experts have developed a superior range of multi-risk garments to meet the demands of the welder.

New Phoenix FR®

ESAB is proud to introduce the very latest technology in inherent flame retardant garments. In many industries workers face a complex mix of safety hazards, yet most protective fabrics protect from one or two hazards only. For this reason, employers in the past have been forced to compromise on safety. Not any more.

Phoenix FR® is proven to protect from flame, weld spatter, heat and electric arc explosion. Its' unique molecular structure means that the flame-resistant properties are inherent and therefore, permanent. This technology is the result of a four year development programme and ensures that all our Phoenix FR® range exceed the very latest ISO international standards.

Welding Clothing/Leather

Leather Workwear

ESAB's Leather protective range is helping to redefine welder protection, with garments that provide optimal fit, comfort, performance, style & durability, resulting in safer, more productive working environments.

The products include jackets, trousers, sleeves, aprons & gaiters, all ideal for every welding application for the professional welder.

ISO EN 11612
Flame Retardance

ISO EN 11611
level 1 and 2

Welding Jackets

The ESAB Proban/leather jackets are designed for maximum comfort and safety. The sleeves and shoulders are made in durable grade A leather to withstand the exposure to welding spatter. The front and back is made from flame retardant Proban material. The garment feature concealed inner pockets, adjustable sleeves and a stand up collar. Kevlar stitched.

Skull Cap

The skull cap is a 100% cotton light weight and comfortable form of additional comfort when worn underneath a welding helmet. Preventing less friction and irritation from the head gear on sensitive parts of the brow.

Skull Cap	0700 010 351
-----------	---------------------

Head Protection

Proban Hood

Flame resistant head protection which cover not only the head but also the neck, nape and shoulders.

Proban Hood

0000 593 269

Leather Head and Chest Protection

These two pieces of leather material, offer protection to the head, neck and chest area. They are ideal for welding in areas where all round protection is needed, to protect against sparks, spatter and any other air born particles from the welding environment. They are split into two pieces. One piece is covering the chest area, whilst the other piece is covering the head and neck area at the back of the helmet. They can easily be adapted to the Origo Tech, New-Tech & Aristo Tech welding helmets.

Leather Chest Protection

Welding Gloves

Glove EN standards and materials

CE labelling – Risk Class – Categorising Personal Protective Equipment (PPE), EU Directive 89/686/EF.

The intention of this directive is to ensure that all PPE sold in Europe corresponds to the relevant EN standards. This will secure a generally identical quality standard throughout Europe. Products that meet the requirements in one or more standards must be branded with the CE logo.

Category 1, Simple Design:

These products protect against minimal risks and can only be used where any risk increases gradually and can be easily identified by the user in advance. The CE labelling consists of only the CE mark.

Category 2, Intermediate Design:

The products are tested and technically approved by an authorised test institute. The institute also examines the manufacturers technical documentation to establish that the product is produced in accordance with the relevant EN standard. The CE labelling consists of the CE mark, the test institute approval number, year of first time approval, pictograms and test performance.

EN 420 (Cat 1) defines the general requirements for most protective gloves as:

- Product and packaging information and labelling
- Care and maintenance
- Size
- The product itself must present no risk to users (requirements concerning chromium content and pH)
- Storage of the products

EN 388 – Protection against mechanical damage

Character

a) Abrasion resistance	0 – 4
b) Blade Cut resistance	0 – 4
c) Tear resistance	0 – 4
d) Puncture resistance	0 – 4

EN 12477 – Welding gloves

Thermal resistance

Character

a) Burning behaviour	0 – 4
b) Contact heat	0 – 4
c) Convective heat	0 – 4
d) Small splashes of molten metal	0 – 4

Test Criteria	Standard	Minimum performance required		Maximum performance achievable
		A	B	
Abrasion resistance	EN 388	2	1	4
Blade cut resistance	EN 388	1	1	5
Tear resistance	EN 388	2	1	4
Puncture resistance	EN 388	2	1	4
Burning behaviour	EN 407	3	2	4
Contact heat	EN 407	1	1	4
Convective heat	EN 407	2	n/a	4
Small splashes of molten metal	EN 407	3	2	4
Dexterity	EN 420	1	4	5

Leather quality

Finding the right quality leather to meet the exacting requirements of the welding professional requires experience. ESAB have extensive knowledge and experience with tanning and finishing – important processes that determine the final quality of the leather. It is these processes that give the leather its qualities in relation to strength, softness and flexibility.

The upper skin is called “grain” and the inner skin is called “split” Grain leather is soft, durable, wear resistant and tolerates some water. It can also withstand heat up to 80°C. Split leather is porous and will therefore absorb humidity more easily than grain leather. Its naturally rough surface gives good grip properties. The thickness depends on how the skin is cut and whether it is cut in one or two layers. Without special treatment, split leather can resist heat up to 100°C.

Ox Leather

A wear resistant grain leather which tolerates water. The leather is often thick, which in addition to its wear resistant properties makes it suitable for use in working gloves that must tolerate rough use. It also gives good protection against heat.

Pig Leather

The surface of the leather is relatively porous which makes the breathability of the glove better than most other leathers. Pig leather is also softer.

Goat Leather

Goat leather is the longest lasting leather. Natural lanolin content makes goat leather extremely flexible. It also has very good wear resistance. Strength and flexibility make this leather very suitable for work where good finger feel and dexterity is required.

Welding Gloves

Welding Gloves MIG/MAG/MMA

All ESAB and Murex gloves are CE approved. The heavy duty welding gauntlets and riggers have been tested and certified by a third party notifying body. The glove is then a Cat. 2 product.

- 

Test against mechanical stress such as abrasion, cut, tear and puncture.
- 

Test for thermal performance such as exposure to an open flame, contact heat, convective heat, radiant heat, small and large splashes of molten metal.

ESAB Curved MIG Glove

These superior new welding gloves from ESAB offer a whole new approach to fit, form and function. Ergonomically designed to fit the natural curve of the hand, offering increased quality & comfort to the wearer. The MIG glove is made from heavy & fine cut leather, and is lined from hand to cuff. With the curved design the glove fits the hand perfectly, and also has a flexible wrist area which reduces friction. With welted seams, kevlar stitching & reinforced thumb, the glove is very strong and offers a very high level of protection to the wearer. EN 12477 and EN 388 Cat 2.

ESAB Curved MIG, L	0700 005 043

Heavy Duty Basic

A high quality 1.2/1.3mm thick side split cow leather welding gauntlet with Wing thumb, fully Kevlar stitching, fully welted. The glove is fully lined with FR cotton to cuff and full fleece jersey liner to palm. This glove offers the welder durability, longevity and total comfort. CE approved to EN12477 and EN388 Cat 2.

Heavy Duty Basic	0700 005 007
------------------	--------------

Welding Gloves

Heavy Duty Regular

A Heavy duty durable yet flexible welding gauntlet. Made from 1.3mm side split cow leather which is fully heat resistant and hard wearing. Features reinforced thumb, fully Kevlar stitched and welted with additional vein patch for added protection. The glove is fully lined with FR cotton to the cuff and fleece jersey liner to the palm. CE approved to EN12477 and EN388 Cat 2.

Heavy Duty Regular

0700 005 008

Heavy Duty Black

Our most popular product, made from high performance cow split leather, high dexterity palm and fingers with wing thumb, fully welted fingers and Kevlar stitched. Ideal for areas of high mechanical stress. CE approved to EN12477 and EN388 Cat 2.

Heavy Duty Black

0467 222 007

Heavy Duty EXL

A high quality welding gauntlet made from both cow split and grain leather. The grain leather back offers excellent heat properties while the split leather offers excellent dexterity, durability and comfort. Features fully reinforced three fold thumb, fully welted, Kevlar stitched with grain back. Fully lined inner with FR cotton to cuff and full Jersey lining to palm. CE approved to EN12477 & EN388 Cat2.

Heavy Duty EXL, L
Heavy Duty EXL, XL

Welding Gloves

Murex Superior Gauntlet

A Hardwearing dexterous 1.2mm cow split leather welding gauntlet with reinforced 1.3mm leather patch to the palm offering the welder a hard wearing product to meet the toughest of industrial processes. Features straight thumb, with reinforced overlay, fully welted, fully lined with FR cotton liner to cuff and fleece jersey lining to palm. CE approved to EN12477 and EN388 Cat 2.

Superior Gauntlet Reinforced

0701 415 615

Red Gauntlet

ESAB's entry level welders gauntlet, made from cow split leather with a cotton FR lining. Fully welted with a wing thumb for added comfort. CE approved to EN12477 & EN388.

Red Gauntlet

0701 380 498

Welding Gloves TIG

ESAB Curved TIG Glove

These superior new welding gloves from ESAB offer a whole new approach to fit, form and function. Ergonomically designed to fit the natural curve of the hand, offering increased quality & comfort to the wearer. The TIG glove is made from thin high quality leather, with improved fit for higher dexterity. The glove is highly durable, with welted seams & kevlar stitching. The glove is also extremely light weight, which increases the comfort to the wearer.

Welding Gloves

TIG Basic

A lightweight durable traditional Tig welders gauntlet up graded to EN12477 & EN388 Cat 2.

TIG Basic

0700 653 532

TIG Soft

A unique ultra thin Goat split leather welding glove, suitable for all Tig applications. Features a reinforced straight thumb, wraparound first finger, vein patch and 13cm extended cuff. CE approved to EN12477 & EN388 Cat 2.

TIG Soft

0700 005 005

TIG SuperSoft

Esab exclusive Tig welding gauntlet made from high quality sheepskin with full Kevlar stitching. Features gun cut straight thumb, cow split 13cm cuff, wraparound 1st finger for increased dexterity, extremely comfortable, dexterous and durable. CE approved to EN12477 & EN388 Cat 2.

TIG SuperSoft

0700 005 006

TIG Professional

A high quality Tig gauntlet made from selected cow hide, features wing thumb with reinforcement, 13cm split leather cuff, vein patch and with the addition of a jersey lightweight liner to the palm. CE approved to EN12477 & EN388 Cat 2.

TIG Professional

0701 415 963

Welding Gloves

Welding Gloves Heat Resistant

Aluminised Hand Shield

Woven Kevlar Aluminised Welders hand shield for use in conjunction with welding gauntlets, to give added protection from radiant heat and general heat stress. Aluminised Kevlar is bonded and Stitched onto a 1.2mm cow split leather which is elasticated to fit all hand sizes.

Aluminised Hand Shield

0700 010 009

Heavy Duty Aluminium 250°C

A high temperature addition to the range. Featuring unique aluminised woven Kevlar back capable of withstanding a radiant heat of up to 1000°C with a heavy duty 1.3mm ceramic fibre supported leather palm capable of Contact palm heat up to 250°C. The glove features wing thumb, fully welted seams, Kevlar stitched with a heavy duty FR drill cotton liner which features a Thermolate treatment to the palm. The aluminium reflects all thermal radiation away from the user. CE approved to EN12477 & EN388 Cat 2.

Heavy Duty Aluminium 250°C

0700 005 010

Heavy Duty Aluminium 500°C

An ultra high temperature 500°C welding gauntlet featuring: unique aluminised woven Kevlar back capable of withstanding 1000°C, with a heavy duty 1.3mm ceramic fibre supported leather palm capable of Contact heat up to 500°C. The glove features wing thumb, fully welted seams, full Kevlar stitching with a heavy duty cotton jersey liner which features a shearwater treatment to the palm. The aluminium reflects all thermal radiation away from the user. CE approved to EN12477 & EN388 Cat 2.

Heavy Duty Aluminium 500°C

0700 005 046

Heavy Duty Aluminium 1500°C

A revolutionary new product which incorporates high technology woven ceramic fibre to the back of the Aluminised Kevlar Gauntlet, which offers protection against 1500°C radiant heat. This is incorporated into a high grade 1.3mm side split leather palm with full Thermolate felt offering 120°C contact heat protection to the palm. The glove is fully lined with jersey palm, offers a wing thumb, fully welted stitching and full Kevlar stitching. CE approved to EN12477 & En388 Cat 2.

Heavy Duty Aluminium 1500°C

0700 005 045

Welding Gloves

Welding Gloves General Handling

ESAB Heavy Duty Worker

A durable, hardwearing rigger style work glove made from high quality cow side split leather, featuring wing thumb, fully welted seams, vein patch, 6cm rubberised cotton cuff with finger tip protection and knuckle strap. Fully jersey lined for added comfort. CE approved to EN388 Cat 2.

Heavy Duty Worker

0700 005 011

Superior Rigger

A hardwearing work glove made from 1.2mm cow split leather. Featuring wing thumb, welted seams, vein patch, 5.5cm rubberised cotton cuff with finger tip protection and knuckle strap. Fully jersey lined for added comfort. CE approved to EN388 Cat 2.

Superior Rigger

0701 415 613

Safety Footwear

All ESAB welding footwear is tested and approved according to EN 345 (safety footwear). Depending on application, footwear should always provide appropriate protection, EN 345 gives the following guidelines:

Safety shoes and boots – Key to symbols:

SB Safety Basic to EN345 200 joules toe protection	S3 Safety Basic, antistatic, energy absorbing heel, water resistant upper & steel midsole (anti penetration)
S1 Safety Basic, antistatic, energy absorbing heel and closed back part	 Antistatic
S2 Safety Basic, antistatic, energy absorbing heel and water and oil resistant upper	DD Dual Density
	 Steel Midsole

ESAB Safety Ankle Boot **DD**

Offers protection according to S3, and it prevents weld spatter from falling into the shoe. The special microfibre soft lining makes it very comfortable to wear. The boot is water and oil resistant and the seam is reinforced with rivets for maximum durability. The front is folded and fastened with velcro to give a flat and protected upper. The dual density sole offers a soft upper part with front and back 'bumpers' and arch support, whilst the part in direct contact with the ground offers extremely high slip resistance. The shoe is equipped with shock absorption and the TF system to prevent ankle spraining risks, also the sole is heat resistant up to 180°C. They have an elasticated tongue for wide fitting feet and high slip resistant soles.

Welding Tools and Accessories

A range of quality tools and accessories for welding, cutting and general engineering applications offering everything from cable connectors to high specification electrode drying ovens. All our welding tools and accessories conform to the relevant EU legislation and standards.

Welding Curtains

Welding Curtains

Three colour types are available and all three can be supplied as standard curtains, as well as strip curtains. The self-extinguishing material provides good protection from dangerous welding radiation. The curtains are fully seamed all around with 5cm wide seams, eyelets every 20cm on one width side, fitted on the right and the left side with a unique snap fastener system. This enables the user to connect the curtains with each other to create a curtain in the required width. The strip curtain allows access and enables material to be passed through, even when it is closed. All approved according to EN 1598, the European standard for welding curtains. The mounting rings come in a package of seven, which is enough to mount any of the curtains (standard as well as strip). Rings are included when ordering any of the curtains.

Welding curtain, dark red, 1.8 x 1.4m	0700 008 004
Welding curtain, green transparent, 1.8 x 1.4m	0700 008 005
Welding curtain, dark green (DIN 9), 1.8 x 1.4m	0700 008 006
Welding strip curtain, dark red, 1.8 x 1.4m	0700 008 001
Welding strip curtain, green transparent (DIN 6), 1.8 x 1.4m	0700 008 002
Welding strip curtain, dark green (DIN 9), 1.8 x 1.4m	0700 008 003
Mobile curtain, without wheel, dark red, 2 x 1.4m	0000 595 313

Mounting rings metal	0700 008 008

Wire Reel for Welding Curtains

The wire reel is used when hanging the curtains. The wire is an 8 metre retractable stainless steel line. The unit is fixed to the wall and the line is tightened by using the specially designed torque control.

Wire reel for welding curtain	0700 008 018

Welding Curtains

ESAB VersiFlex Frame for Welding Curtains

The new frame is made from jointed 32 and 22mm diameter steel tubing, with the joints to the leg portions being precision swaged for a sturdier joint. The ultra stable frame with a 700mm pitch for the feet width comes with rubber feet as standard. The offset legs enable two frames to be put together to make a tight 90 corner, or 4 frames together to make a cubicle.

As standard the Versi Flex frame can make 3 width sizes:

- 1) 1000 as a frame to make a cutting barrier with a Welding Blanket.
- 2) 1400 as the standard welding curtain frame.
- 3) 2000 as wider version of the above.

Options for the frame:

- 1) A set of 4 wheels, these simply screw into the sockets covered by the standard rubber feet, turning the screen into a mobile.
- 2) A set of 2 outriggers, these are used to make sides to a standard frame as a partial cubicle.

ESAB VersiFlex frame system
Set of outrigger arms (Set of 2)
Set of wheels (Set of 4)

Welding Blankets

Welding Blankets

The ESAB Welding blankets are produced using heat and flame resistant fabrics. The blankets provide excellent protection from grinding/welding sparks, slag and drops of molten metal. ESAB offer a wide range of blankets with different characteristics and in many different sizes. The blankets are colour coded.

When selecting the most suitable blanket for the application, the following factors should be considered:

Positioning of the blanket – All blanket are to be used on an incline of at least 15 degrees. Sparks hitting a blanket, which is positioned horizontally, will put extra stress on the material and a stronger and more heat resistant blanket should be used.

Work application – For light duty welding or grinding a thinner and less heat resistant blanket can be used. For heavy duty welding or cutting when the blanket is exposed to drops of molten metal then a more durable blanket should be used.

Welding Blankets

Light Duty Applications

Welding Blanket 3001

P.U. coated fibreglass blanket for light sparks and spatter. Provides an excellent vertical screen to protect equipment and personnel from the spray of sparks. Maximum temp. = 550°C, Weight = 460g, Colour = Grey.

2m x 1m	0700 008 026	1m x 25m roll	0700 008 028
2m x 2m	0700 008 027		

Medium Duty Applications

Welding Blanket 1850

Heat treated fibreglass blanket for medium sparks and spatter. Best when used on an incline of at least 15 degrees. Very flexible. Maximum temp. = 550°C, Weight = 600g, Colour = Tan.

2m x 1m	0700 008 023	1m x 25m roll	0700 008 025
2m x 2m	0700 008 024		

Welding Blanket 2-1900

Vermiculite coated silica welding blanket for medium duty applications. The silica fibre has a high melting temperature of 1600°C making it an excellent choice when drops of molten metal are a problem. The MD1300 blanket resists most acids. Max temp. = 1600°C, Weight = 600g, Colour = Bronze.

2m x 0.9m	0700 008 032	0.9m x 25m roll	0700 008 034
2m x 1.8m	0700 008 033		

Heavy Duty Applications

Welding Blanket 906

Fibreglass blanket with a specially formulated graphite and polyurethane solution which provides high temperature and abrasion resistance. Suitable for medium to heavy duty industrial applications. Not suitable in very oily situations. Maximum temp. = 750°C, Weight = 1020g, Colour = Black.

2m x 1m	0700 008 029	1m x 25m roll	0700 008 031
2m x 2m	0700 008 030		

Special Duty Applications

Welding Blanket 5180

A carbon fibre felt welding blanket for heavy duty applications. This blanket offers extreme heat resistance of 1300°C. The 5180 is extremely light and it's been designed for the automotive industry. Maximum temp. = 1300°C, Weight = 425g, Colour = Black.

2m x 1m	0700 008 035	1m x 25m roll	0700 008 037
2m x 2m	0700 008 036		

Cables & Connectors

Welding Cable <HAR> H01N2-D

ESAB welding cable is of the highest quality and has top-class performance characteristics. This cable is approved in accordance with international standards and it is harmonised <HAR>. The cable is extremely resistant to light, chemicals and mechanical damage and it maintains its flexibility even when used in a cool environment. (Certified to HD 22.6)

Technical data

Conductor: Plain annealed copper stranded wires
Insulation: Flame retardant oil resistant
Colour of sheath: Black
Test Voltage 50Hz: 1000V
Maximum conductor operating temp: +85°C
Lowest ambient temperature for fixed installation: -40°C
Lowest installation temperature: -25°C
Maximum short-circuit conductor temperature: +250°C
Pulling strength: The maximum static pulling strength may not exceed 15N/mm²
Minimum bending radius: 6 x D ; D – overall diameter of cable
Flame propagation: EN 60332-1-2:2004, IEC 60332-1-2:2004

Tested and certified according to: HD 22.6

Type 1 Angle connection, 1 male, 2 female	0365 557 001
Type 2 Angle connection, 2 male, 1 female	0365 558 001

CC17/18 Connectors

These heavy-duty connectors feature the cone and bush design of cable connection. They have high quality black rubber boots with positive lock and seal. They will accept up to 70mm² copper or aluminium cable.

CC17 Plug	0700 606 402
CC18 Socket	0700 606 403

Electrode Holders

Electrode Holder ESAB 200, 400 and 500

ESAB's CE-approved screw-type electrode holder offers many advantages including:

Excellent current transfer between electrode and holder

Two hole positions at 45 and 90 for welding in different positions

Electrode cable held in place by two Allen screws

All electrode holders are fully insulated to provide maximum safety

ESAB 200, 200 A (35%)	0333 249 001
ESAB 400, 400 A (35%)	0369 849 880
ESAB 500, 500 A (35%)	0369 850 880

Electrode Holder Optimus

A closed head electrode holder allowing the electrode to be fitted either horizontally or vertically. The electrode holder is made of glassfibre-reinforced plastic. All Optimus electrode holders are fully insulated.

Optimus 300, 400 A (35%)	0760 001 300
Optimus 400, 500 A (35%)	0760 001 400
Optimus 600, 600 A (35%)	0760 001 600

Electrode Holder Samson

An open head electrode holder, the Samson is the 'classic' electrode tong design of electrode holder, made of a glassfibre-reinforced plastic. All Samson electrode holders are fully insulated.

Samson 300, 300 A (60%)	0760 002 300
Samson 400, 400 A (60%)	0760 002 400
Samson 500, 500 A (60%)	0760 002 500

Eco Holder Handy

A 'screw type' electrode holder with a fully insulated head and handle.

Handy 200, 200 A (35%)	0700 006 003
Handy 300, 300 A (35%)	0700 006 016
Handy 400, 400 A (35%)	0700 006 013

Electrode Holders & Clamps

Eco Holder Confort

An open head electrode holder with a fully insulated head and handle.

Confort 200, 200 A (35%)	0700 006 004
Confort 300, 300 A (35%)	0700 006 005
Confort 400, 400 A (35%)	0700 006 015

Eco Holder Prima

A closed head electrode holder with a fully insulated head and handle.

Prima 200, 200 A (35%)	0700 006 006
Prima 300, 300 A (35%)	0700 006 007
Prima 400, 400 A (35%)	0700 006 014

Murex Handicool

This is a crocodile style electrode holder, which is made from black phenolic resin insulated jaws and black handle. The holder is fully insulated for extra safety and copper jaws for good contact.

400 A Handicool Electrode Holder	0700 605 376
600 A Handicool Electrode Holder	0700 605 378

Murex Econ

This is a twist grip, short stub electrode holder. All the electrode is available for use and the angle allows the hand to remain away from the weld pool. The handle is used to apply torque to the electrode clamp in the head.

Econ 405 Electrode Holder	0701 380 433
Econ 605 Electrode Holder	0701 380 434

Return Clamps

MK 150, MP 200, MP 300 and MP450

The MK 150 is a fully galvanised earth clamp with a maximum opening of 50mm. The MP 200, MP 300 and MP 450 are robust earth clamps with strong gripping power for good contact. The maximum opening for the MP 200 is 50mm and 55mm and 60mm for the MP 300 and MP 450 respectively.

MK 150, 150 A (35%)	0682 103 801
MP 200, 200 A (35%)	0367 558 880
MP 300, 300 A (35%)	0682 103 803
MP 450, 450 A (35%)	0000 419 450

Eco Clamps

An earth clamp that provides good contact with the work piece and is available in two sizes.

Eco clamp 250, 250 A (35%)	0700 006 001
Eco clamp 400, 400 A (35%)	0700 006 002

Return Clamp EG 600 and JK3

The EG 600 is an extremely robust earth clamp made of brass. The welding cable is attached using a hexagonal socket screw and the clamp has a maximum opening of 50mm and a maximum capacity of 600 amperes. The JK3 is a C-clamp model, galvanised and with a maximum opening of 48mm and maximum capacity of 500 amperes.

EG 600, 600 A (35%)	0160 288 001
JK3, 500 A (35%)	0000 103 588

Return Clamp CC11

This clamp is robustly constructed from substantial castings. The screw lever allows maximum compression to the workpiece. Suitable for up to 600 amps.

CC11 Screw Type Earth Clamp	0701 400 000
-----------------------------	---------------------

Magnetic Earth Clamps

Magnetic earth clamps with strong gripping power that permits attachment to any ferrous object. These clamps provide a large contact area with less overheating thanks to fewer junctions.

Magnetic earth clamp 400 A (35%)	0000 500 415
Magnetic earth clamp 600 A (35%)	0000 500 416

Couplings & Clamps for Rotating Workpieces

Rotatable Earth Couplings

A good connection to the workpiece is needed to obtain optimal manual or automatic welding. For rotating workpieces, an earth connection with a rotatable earth coupling is the safest choice. A range of current couplings is available. To attach the coupling to the workpiece, special clamps are available. (Please see: Return clamps for rotating workpieces).

NKK 400 - max 400 A, (1.65kg)	0000 595 133
NKK 600 - max 600 A, (2.2kg)	0700 004 007
NKK 800 - max 800 A, (2.7kg)	0700 004 001
NKK 1200 - max 1200 A, (4.0kg)	0700 004 002
NKK 2000 - max 2000 A, (7.3kg)	0700 004 003

Return Clamps for Rotating Workpieces

The earth clamps K2 or PZ3 can be mounted directly on to the rotatable earth coupling to create a good contact between the work piece and the return cable. The return clamps can also be used together with the GA 800 to form a complete earth clamp that can handle high current welding on non-rotating work pieces.

GA 800 - handle connection for K2	0700 004 005
-----------------------------------	---------------------

K2 - clamp head for NKK 800 or 1200	0700 004 004
-------------------------------------	---------------------

PZ3 - pole clamp for NKK 2000	0700 004 006
-------------------------------	---------------------

Anti Spatter

ESAB Pre-Weld Anti Spatter

The ESAB Pre-Weld fluid is so much more than a traditional anti spatter. ESAB have managed to develop a product that has a much higher concentration of the active substance than any other product available. The product does not evaporate off the work piece, it gives extraordinary protection all the way from the very edge of the weld and out across the work piece. But still the product is completely safe, no dangerous/harmful substances are included. The fluid is absolutely silicon free and water-soluble, there are no problems with painting or with any other after treatments. The spray can contains 600 ml of active fluid, no solvents. The fluid is kept in an aluminium bag inside the can. The pressure surrounding the bag forces the fluid out when the valve is opened. This allows the can to be sprayed at any angle and still allows you to get every drop of fluid from the can. Note that it is only active fluid that is released, this is what makes the product so efficient.

ESAB Pre-Weld anti spatter 600 ml	0700 013 013

ESAB Pre-Weld anti spatter 25 litre	0700 013 015
Tap for 10 litre	0700 014 017
Tap for 25 litre	0700 014 018
Hand spray bottle	0000 138 408

ESAB High-Tech Anti Spatter

Combines uncompromising efficiency with active environmental and health protection. The High-Tech spray effectively prevents spatter from sticking on the work piece. The High-Tech weld-protect air-spray is absolutely non-combustible, has no toxic classification, uses no harmful gases and is safe for the skin. The propellant is compressed air, it is solvent free and gives no indirect air pollution or contribution to the greenhouse effect. It is absolutely silicon-free and water-soluble.

High-Tech 400 ml	0760 025 500
High-Tech 10 litre	0760 025 010
High-Tech 25 litre	0760 025 025
Tap for 10 litre	0700 014 017
Tap for 25 litre	0700 014 018
Hand spray bottle	0000 138 408

ESAB Eco-Tech Anti Spatter

The ESAB Eco-Tech is a high performing anti spatter spray, which is completely safe, both for the welder and environment. The propellant is compressed air, hence it is completely none-combustible. The solvent free liquid should be applied in a thin layer before welding. The Eco-Tech is water based and does not contain anything that can interfere with painting, galvanising or any other after treatments.

ESAB Eco-Tech anti spatter 300 ml	0700 013 007

Tap for 25 litre	0700 014 018
Hand spray bottle	0000 138 408

Chemical Sundries & Indicators

ESAB Jig and Tool Protection

The ESAB Jig and Tool protection prolongs the lifetime of the welding shroud and contact tip as well as giving an extremely good protection to tools and jigs. The spray dries quickly and leaves a heat resistant layer (1300°C) and it does not burn off. Hardly any spatter sticks to the surface and if it does, a gentle wipe with the glove will remove it.

ESAB Jig and Tool protection, 400 ml

0700 013 016

ESAB Spatter Shield

The ESAB Spatter shield prolongs the lifetime of the welding shroud and contact tip. Apply the fluid by dipping the torch and let the fluid dry. The fluid creates a heat resistant layer that prevents spatter from sticking. The spatter shield should be applied 2-3 times per 8-hour shift to give protection. Unlike tip dip products, when using the ESAB spatter shield you will NOT experience any problems with porosity created by drops of anti spatter falling down into the weld.

ESAB Spatter shield, 250 ml

0700 013 017

Clean Weld Welding Paste

Prevents spatter from sticking as it forms a heat-resistant coat. The hot gas nozzle on the welding torch should be dipped about 20-25mm into the paste for effective results. Odourless and contains no solvents, silicone or abrasive agents and is delivered in a 0.5kg metal can.

Clean Weld welding paste, net weight 0.5kg

0365 560 001

Non Destructive Testing Aerosols

The ESAB NDT testing should be used to identify cracks in a weld. The process consists of 6 steps and to perform the test a cleaner, a penetrant and a developer is required. The procedure should be as follows:

1. Use ESAB cleaner and wipe dry.
2. Spray ESAB Penetrant, leave for 15 min.
3. Wipe away the penetrant from the surface.
4. Use the cleaner in a dry cloth, wiping in one direction only. Wipe dry.
5. Shake and then spray on the developer, leave for 10 min then see results.
6. Remove the developer and dye using the cleaner.

ESAB NDT Penetrant 300 ml Aerosol

0700 013 018

ESAB NDT Developer 400 ml Aerosol

0700 013 019

ESAB NDT Cleaner 300 ml Aerosol

0700 013 020

Chemical Sundries & Indicators

ESAB Leak Detector

The ESAB gas leak detector can be used on the gas hoses leading from the gas cylinders or on the regulators in order to detect a gas leakage. The product is sprayed on and in case of a leakage the liquid will create bubbles. The composition does NOT contain any aggressive substances.

ESAB Leak Detector Pistol Type, 500 ml

0700 013 021

ESAB Mask Spray

The ESAB mask spray should be applied to the cover lenses in a helmet to keep them mist free and clean. 300 ml.

Mask spray, 300 ml

0700 013 026

Weld Marker

The ESAB weld marker marks all metal, wood, plastic, glass and hard surfaces. Low chloride colour makes it safe for marking stainless steel. Do not roll tube. Dries in five minutes.

Weld marker, white

0700 013 003

Metal marker, yellow

0701 415 418

Weld Marker Kit

The weld marker kit consists of three differently coloured pens, red, green and black. The pens can be used on most types of material.

Weld marker kit

0700 013 004

Chipping Hammers

Pneumatic Chipping Hammer HCB

This high impact speed chipping hammer produces virtually no vibration in the hand as a result of a built-in balance system, which absorbs recoil and counteracts shaking. A range of chisels are available for the HCB, they all have a tungsten-carbide tip and offer a long service life. Narrow chisel: 15mm wide for normal de-slugging and cleaning. Wide chisel: 35mm wide for removing spatter and de-burring after gas cutting.

Spares for Pneumatic Chipping Hammer HCB Fig 8

Chipping Hammers & Fillet Gauges

Chipping Hammer SH2 and SH3

The SH2 chipping hammer is made of special high-quality steel, and has a user-friendly handle. The SH3 is a small hammer with a chisel and tip and steel handle with a plastic grip.

Chipping Hammer SH2	0000 663 000
Chipping Hammer SH3	0683 200 001

Wooden Chipping Hammers

High quality tempered head and wooden handle. Chisel and point ends.

Martellina Wood	0000 915 051
Wooden Chipping Hammer TH/5	0701 380 106

Fillet Gauge KL-1 Laser

To measure the A dimension of fillet welds. Two measurement areas: max. 7mm and max. 15mm. Complete with a leather pocket. Delivered with calibration certificate.

Fillet Gauge KL-1 Laser	0000 139 931
-------------------------	--------------

Fillet Gauge KL-2 Laser

To measure the A dimension of a fillet welds, the leg (small side of a right-angled triangle) and weld reinforcement height. Complete with leather pocket. Delivered with calibration certificate.

Fillet Gauge KL-2 Laser	0000 139 932
-------------------------	--------------

Filarc Fillet Gauge

To measure the a-dimension on measurement area 3-11mm, K-dimension and 50° and 60° groove angle. Also on fast measurement 4, 5, 6 and 7mm a-dimension and gaps of 1.5, 2 and 3.5mm.

Filarc Fillet Gauge	0000 593 268
---------------------	--------------

Fillet Gauges & Small Tools

INOX Fillet Gauge

To measure the a-dimension of fillet welds and to measure the butted joint weld reinforcement height. Equipped with three scales. Measurement area 0-15mm and measurement sharpness +0,1mm.

INOX Fillet Gauge

0000 593 720

Universal Tool

Pliers specially designed for MIG/MAG welding. Removes spatter from the nozzle, cuts the wire and the tool makes it easy to remove the contact tip and gas shroud.

Universal Tool

0000 134 716

Universal Tool Mini

0000 139 054

Fix Pliers

Fast effective cutting of welding wire and removal of burnt wire. Removes spatter from gas and contact nozzle and can be used for attaching and removing of contact, intermediate and gas nozzles.

Fix 1 12-15mm

0760 022 100

Fix 2 15-18mm

0760 022 200

Inspection Mirrors

Stainless steel inspection mirror for inspecting welds.

Inspection mirror 500mm, with magnetic base

0000 593 319

Small Tools

MIG/MAG Gun Holder

The MIG/MAG gun holder is a simple and practical device for the convenient holding of the MIG/MAG gun when not in use. It is equipped with a magnetic foot for stability and is suitable for use with most MIG/MAG welding guns.

MIG/MAG Gun Holder

0760 022 300

TIG Torch Holder

The TIG torch holder is a simple and practical device for the convenient holding of the TIG torch when not in use. It is equipped with a magnetic foot for stability and is suitable for use with most TIG torches.

TIG Torch Holder

0760 022 400

Magnetic Position Holders

The powerful magnets keep the work piece in place when welding or soldering plates together at angles. The large model can support weights up to 36kg whilst the small one can support up to 20kg.

Magnetic Position Holder small (120 x 80mm)

0700 014 015

Magnetic Position Holder large (160 x 100mm)

0700 014 016

Murex Nozzle Cleaner Set

Prolongs the life of welding and cutting nozzles. Murex nozzle cleaner does not file the nozzle bore. Each set contains a range of nozzle cleaners from 0.46mm to 1.74mm.

Nozzle Cleaner Set

0700 153 391

Small Tools

Murex Combination Spanner

For use with Murex gas equipment. Fits Kennedy nut, hose nut and cylinder valve.

Combination Spanner

0701 414 766

Murex Spindle Key

Provides the correct leverage for opening cylinder valves.

Spindle Key K5

0701 380 120

SL3 Cup Sparklighter

A standard cup type sparklighter.

SL3 Cup Sparklighter

0701 380 220

SL3 Flints Pk 5

0701 380 221

SL2 Sparklighter Pistol

A pistol type sparklighter.

Special Process Equipment

Completing the extensive accessory portfolio from ESAB is our Special Process Equipment range, which includes tungsten grinders, gouging torches and fume extraction units. As with all our products our Special Process Equipment range conforms to all relevant EU legislation and standards.

ESAB Drying Equipment

DS5 Dry-Storage Container

The DS5 is a very light and portable dry-storage container for welding electrodes. The container has a multi-position handle offering numerous carrying positions, for increased comfort.

The oven utilises a 150°C preset thermostat, and houses a fibreglass sleeved rope heating element, which extends along the entire oven chamber. This provides uniform heating to all rods with in the oven chamber.

Capacity	5kg
Storage temp. (°C)	150
Voltage (V) AC	120/240
Insulation	3.8cm
Outer dimension (Ø/height, mm)	150/520
Inner dimension (Ø/height, mm)	73/503
Weight (kg)	4.8

DS5 Dry-Storage Container 240V	0700 011 086
DS5 Dry-Storage Container 110V	0700 011 088

DS8 Dry-Storage Container

The DS8 is a very light and portable dry-storage container for welding electrodes. The container has a multi-position handle offering numerous carrying positions, for increased comfort.

The oven utilises a 150°C preset thermostat, and houses a fibreglass sleeved rope heating element, which extends along the entire oven chamber. This provides uniform heating to all rods with in the oven chamber.

Capacity	8kg
Storage temp. (°C)	150
Voltage (V) AC	120/240
Insulation	3.8cm
Outer dimension (Ø/height, mm)	216/609
Inner dimension (Ø/height, mm)	86/503
Weight (kg)	5.5

DS8 Dry-Storage Container 240V	0700 011 087
DS8 Dry-Storage Container 110V	0700 011 089

PK 1 Dry-Storage Container

The PK 1 is a light and handy dry-storage container for electrodes. It is easy to carry and has a storage temperature of around 100°C. The heating element runs from the top to the bottom and the top is fully insulated.

Capacity	9kg
Storage temp. (°C)	100
Drying temp. (°C)	N/A
Voltage (V)	24/42/110/230
Output (kW)	0,1
Outer dimension (Ø/height, mm)	225/610
Inner dimension (Ø/height, mm)	100/470
Weight (kg)	6

PK 1, 24 V	0000 515 063
PK 1, 42 V	0000 515 052
PK 1, 110 V	0000 515 062
PK 1, 230 V	0000 515 064

PK 5 Drying Equipment

The PK 5 is a combined drying and dry-storage system for most types of electrodes. The drying time at full effect is 1-7 hours depending on the type of electrode. The temperature is thermostatically controlled and ranges from 50-300°C. The electrodes should be stored in the PK 5 without packaging. The heating element runs from the top to the bottom and the top is fully insulated.

Capacity	24kg
Storage temp. (°C)	70-300
Drying temp. (°C)	N/A
Voltage (V)	110/230
Output (kW)	0,5
Outer dimension (Ø/height, mm)	345/660
Inner dimension (Ø/height, mm)	116/460
Weight (kg)	13

PK 5 drying equipment, 110 V	0700 011 070
PK 5 drying equipment, 230 V	0000 515 075

SK 40 Dry-Storage Cabinet

The SK 40 is a dry-storage cabinet with 4 removable shelves for storing electrodes. The electrodes should be stored without packing. The cabinet is equipped with a thermometer, thermostat and control lamp. Temperature range 50-180°C.

Capacity	120kg
Storage temp. (°C)	50-180
Drying temp. (°C)	N/A
Voltage (V)	230
Output (kW)	0,7
Outer dimension (WxDxH, mm)	530 x 640 x 750
Inner dimension (WxDxH, mm)	470 x 510 x 520
Weight (kg)	55

SK 40 dry-storage cabinet, 230 V	0000 515 102
----------------------------------	---------------------

ESAB Drying Equipment

PK 40 Drying Cabinet

The PK 40 is a robust cabinet for the drying and dry storage of electrodes, with space for 10 packs. The drying time is set manually at between 50 and 350°C. Dimensions 570 x 620 x 790mm. Weight 70kg.

Capacity	72kg
Drying temp. (°C)	50-350
Voltage (V)	230
Output (kW)	1,5
Outer dimension (WxDxH, mm)	570 x 620 x 790
Inner dimension (WxDxH, mm)	460 x 510 x 520
Weight (kg)	70

PK 40 drying cabinet, 230 V

0000 515 105

PK 410 Drying Cabinet

The PK 410 is a robust cabinet for the drying and dry storage of electrodes. The drying temperature can be regulated between 50 and 400°C (450°C, 3-phase). The dry-storage temperature is around 150°C. The PK 410 is equipped with a control lamp, electronic thermometer and electronic thermostat. The PK 410 also has a 7-day timer. This timer makes it possible to change automatically from drying to dry storage at selected times and temperature ranges.

230V

Capacity	252kg
Storage temp. (°C)	50-400
Drying temp. (°C)	50-400
Voltage (V)	230
Output (kW)	3,5
Outer dimension (WxDxH, mm)	860 x 760 x 1280
Inner dimension (WxDxH, mm)	655 x 485 x 635
Weight (kg)	230

400V

Capacity	252kg
Storage temp. (°C)	50-400
Drying temp. (°C)	50-400
Voltage (V)	400-3
Output (kW)	4,5
Outer dimension (WxDxH, mm)	860 x 760 x 1280
Inner dimension (WxDxH, mm)	665 x 485 x 635
Weight (kg)	230

ESAB Drying Equipment

JS 200 Storage Silo

The JS 200 is a storage silo for welding powder (flux). The JS 200 keeps the flux dry and clean and also makes it extremely easy to handle the flux. The temperature can be adjusted between 100 and 300°C.

Capacity	200 Lt
Storage temp. (°C)	100-300
Drying temp. (°C)	N/A
Voltage (V)	230
Output (kW)	2
Outer dimension (WxDxH, mm)	510 x 570 x 1755
Weight (kg)	110

JS 200 storage silo **0000 515 090**

JK 50 Powder Drier

The JK 50 is a container for drying and storing welding powder (flux). The JK 50 dries 50 litre flux at a maximum temperature of 500°C in around three hours. After drying, the temperature falls automatically to the pre-set dry storage temperature (150°C) within 12 hours.

Capacity	50 Lt
Storage temp. (°C)	50-250
Drying temp. (°C)	50-500
Voltage (V)	400-3
Output (kW)	3,7
Outer dimension (Ø/height, mm)	860/1600
Weight (kg)	190

JK 50, 400 V, 3-phase **0000 515 091**

Murex Drying Equipment

Quivers

Heated Quivers are designed for use on installations with 100 volt or 240 volt supply. The quiver will maintain an even temperature of 100°C dependant on the amount of electrodes stored. Complete with handle/stand.

Supply	110v or 110/240v. AC 50/60Hz
Load	150 watts
Overall dimensions (WxDxH, mm)	120 x 500 x 110
Weight Empty	3 Kilo
Capacity	9kg of Welding Electrodes

Heated Quiver 110 V	0701 380 485
Heated Quiver 110/240V	0701 380 486
Insulated Heated Quiver 240v	0701 502 358

Portable Drying Oven – Dual Voltage

This oven is designed for rugged site conditions, where it can be used as either a holding or storage oven.

Temperature range	100-300°C thermostatically controlled
Supply	110.240v. (Dual voltage)
Load	300 watts
Overall dimensions (WxDxH, mm)	175 x 610 x 210
Internal dimensions (WxDxH, mm)	115 x 480 x 150
Weight Empty	10 Kilo
Capacity	13kg of Welding Electrodes

Portable Drying Oven – Dual Voltage	0701 380 083
-------------------------------------	---------------------

Stationary Drying Oven

These ovens can be used as the sole means of drying or as the intermediary, until transferred to a portable oven or a quiver.

Temperature range	100-300°C thermostatically controlled
Supply	110v or 250v AC. 50/60Hz
Load	1500 watts
Overall dimensions (WxDxH, mm)	520 x 620 x 610
Internal dimensions (WxDxH, mm)	455 x 470 x 455
Weight Empty	42 Kilo
Capacity	136kg of Welding Electrodes

Stationary Drying Oven 250V AC	0700 655 258
Stationary Drying Oven 110V AC	0700 655 259

Alternative Drying Ovens

Stationary Drying Oven Digital

As the Stationary Oven, but with a digital display.

Temperature range	0-300°C thermostatically controlled
Supply	110/240v
Load	2250 watts
Overall dimensions (WxDxH, mm)	530 x 620 x 620
Internal dimensions (WxDxH, mm)	465 x 480 x 465
Weight Empty	45kg
Capacity	136kg of Welding Electrodes
Digital Display	YES

Stationary Oven Digital 250V AC

0701 502 381

High Temperature Ovens

The robust, high temperature oven has a digital display. It has accurate temperature control from 0 – 500°C. Visual temperature indication is by the digital display. Temperature settings are digitally set.

Temperature range	0-500°C thermostatically controlled
Supply	110 or 240v
Load	3 Kw
Outer dimensions (WxDxH, mm)	600 x 685 x 760
Internal dimensions (WxDxH, mm)	470 x 480 x 470
Weight Empty	75kg
Capacity	136kg of Welding Electrodes
Digital Display	YES

High Temp Oven – Digital Display

0701 380 408

As above but with Chart Recorder

Storage Temperature	0-500°C
Hold Cycle 1	YES
Baking Temperature	0-500°C
Hold Cycle 2	YES
Supply	110 or 240v
Load	3 Kw
Delay Timer	7-Day Programmable
Chart Recorder	Optional
Outer dimensions (WxDxH, mm)	600 x 685 x 760
Internal dimensions (WxDxH, mm)	470 x 480 x 470
Weight Empty	75kg
Capacity	136kg of Welding Electrodes
Digital Display	YES

High Temp Oven – CR DD Timer

Tungsten Grinders

G-Tech Handy II

The G-Tech Handy II is a portable enclosed Tungsten Electrode grinder, which is easy to operate. The Tungsten electrode can be ground without using a holder or tool. The grinding head can be adjusted in three different positions: 0, 1 and 2. In each position another part of the grinding disc will be used, and both sides of the disc can be utilised, giving extended use and reduced cost.

The G-Tech Handy II features a multifunctional cover, which allows the electrode to be ground in a 90° angle. The machine is prepared for fixing to a table using the accessories included.

The G-Tech Handy II is delivered complete for grinding of tungsten electrodes in the dimension of 1,6 – 2,0 - 2,4 - 3,2mm. A head for grinding of 1,0 – 4,0 – 4,8 – 6,0mm electrodes can be supplied as an option.

The G-Tech Handy II features:

Ergonomic Design & Lightweight

Adjustable Grinding Angles (20° - 60°)

Double Sided Grinding Disc – Coated with Diamante Powder

Allows Exact Repetition of Longitudinal Grinding

Can be Connected to a Vacuum Cleaner

Option: Orbital-Set for Grinding of Short Tungsten-Electrodes with a length up to 15mm Max

Tungsten Grinders

G-Tech Handy

The G-Tech Handy is an easy to use tungsten electrode grinder. The grinding angle can be adjusted easily, using just one hand. The G-Tech Handy grinds electrodes with dimensions of 1.0 to 4.0mm and it is equipped with a dust filter. The speed (rpm) can be adjusted and the unit weighs just 2.8kg. The G-Tech Handy is delivered in a durable hard case that makes it easy to transport.

Tungsten Grinders & Electrodes

G-Tech and Spares

The ESAB G-Tech is a tungsten-electrode grinder with a unique enclosed wet-grinding system. A wet grinding system is the most effective protection from thoriated tungsten grinding dust. All dust is collected in the liquid and the risk of oxidation of the electrode is reduced. The grinding angle can be adjusted and the tip can be ground in a 90 degrees angle to make it less pointed. The small table seen in the picture is not included and is not available from ESAB.

TIG Pen

The TIG PEN allows the welder to control the tip of the filler wire with great accuracy even at a long distance from the weld seam and in the process helps the welder to obtain a higher quality weld. It also eliminates waste of the filler wire. The TIG Pen can be used with any wire diameter from 1.0 to 3.2mm

Tungsten Electrodes

Tungsten Electrodes

This is a high-quality range of tungsten electrodes available in thoriated, ceriated, pure and lanthanated (Gold Plus) versions. ESAB tungsten electrodes have excellent welding and ignition properties. They are delivered in plastic boxes, each containing ten electrodes. The electrodes are available in 150 and 175mm lengths.

Gouging Torches

K4000 (Fig 11)

The arc air gouging torch is supplied with a 2.14m (7') long cable. The torch accepts both round and flat electrodes, ranging in size from 4mm (⁵/₃₂") to 13mm (¹/₂") round electrodes and 10mm (³/₈") and 16mm (⁵/₈") flat electrodes. The K4000 is rated at 1,000 Amps, it uses compressed air between 5.6 and 7.0kg/cm² (80 and 100 psi) and between 0.85 and 0.99 m³/min (30 and 35 cfm). The torch and cable weigh 2.4kg (5.4lbs). Supplied without connections.

Gouging Carbons

OK Carbon™

Arc air gouging with carbon electrodes and compressed air is the fastest and cheapest process for cutting/gouging material in conjunction with repairs and similar processes. A carbon electrode is used to melt the material and, at the same time, a powerful jet of air blows away the molten material. The compressed air also cools the carbon electrode. Carbon electrodes can be used for the arc air gouging of unalloyed and low-alloy steel, stainless steel, cast iron and other metals. A complete set of arc air gouging equipment consists of an arc air gouger, the Flair 600 or Flair 1600, alternatively the K4000 with mono cable. OK Carbon™, ESAB's focused but comprehensive range of arc air carbons enables the user to gouge in a wide range of applications, within foundries, steel industry, shipbuilding, steel construction and in maintenance workshops. The OK Carbon™ range gives the user the highest possible efficiency by removal of metal per unit length or unit time.

Fume Extraction Units

CarryVac 2

The CarryVac 2 P150/P150 AST are two small, lightweight, portable extraction units designed to be carried to the working area. Connected to a welding torch or to an extraction nozzle, the CarryVac 2 units extract the fume directly at source. The polluted air is filtered and captured in a hygienically-packed filter. The CarryVac 2 is equipped with a filter indicator, which shows when the filter must be replaced. It is ideal for maintenance welding, low and medium-duty cycle. The filter capacity is approximately 200kg of solid wire or twelve 15kg spools. The CarryVac 2 P150 AST is equipped with an automatic start/stop function, which increases the service life of each filter and of the unit itself. Please also see ESAB Centrovac extraction torch range.

Notes

World leader in welding and cutting technology and systems

ESAB operates at the forefront of welding and cutting technology. Over one hundred years of continuous improvement in products and processes enables us to meet the challenges of technological advance in every sector in which ESAB operates.

Quality and environment standards

Quality and the environment are two key areas of focus. ESAB is one of few international companies to have achieved the new ISO 14001 standard

in Environmental Management Systems across all our global manufacturing facilities.

At ESAB, quality is an ongoing process that is at the heart of all our production processes and facilities worldwide. Multinational manufacturing, local representation and an international network of independent distributors brings the benefits of ESAB quality and unrivalled expertise in materials and processes within reach of all our customers, wherever they are located.

* Includes manufacturing facilities of ESAB North America. A wholly owned subsidiary of Anderson Group Inc.

ESAB reserves the right to alter specifications without prior notice.

Global solutions for local customers – everywhere.
